TONY BARRY – International Skateboarder!

Tom Barry is 17, and started skateboarding when he was nine. He grew up in New York where he practiced hard and won his first competition when he was 14. He was lucky. A writer from SKATE IT! Magazine watched him that day, and then wrote an article about him. "They even made a video of me!" Tom said. "I left school last year and now the magazine is paying me to practise and to skateboard in international competitions. But I'm not doing this for money. I'm doing this because it's so much fun!"

Tom has just returned from Japan. Skateboarding is the third most popular sport for boys aged 12-16 in the USA, but in Japan it is less well-known.

"I took my skateboard out onto the city street and the traffic stopped as people watched me!" Tom said. "A problem for skateboarders in Japan is that there aren't many places where they can practice outside. Skate parks are usually inside big buildings in large cities, so street skating is difficult there. But things are changing. I loved the trip and hope to go back to Japan to skate there again soon.

4. Complete the text with the adverbs from the given

ALTERNATIVELY EVENTUALLY FIRSTLY HOWEVER SIMILARLY
ENOUGH FINALLY GRADUALLY MOREOVER WELL

There are four main theories to explain where the moon comes from. ⁽¹⁾....., there is a theory that it was part of our Earth which was thrown into space because the Earth was spinning so fast. ⁽²⁾....., scientists believe the Earth has never spun fast ⁽³⁾..... for this to happen. ⁽⁴⁾....., this theory does not properly explain the moon's current patterns of movement. ⁽⁵⁾....., perhaps the moon started life somewhere else in the universe and ⁽⁶⁾..... came closer to our Earth before ⁽⁷⁾..... becoming part of a two-body system. Scientists have calculated, however, that this almost certainly did not happen. ⁽⁸⁾....., the theory that the Earth and moon were formed simultaneously is also not widely believed. ⁽⁹⁾....., there is the theory that the Earth was hit violently by a body as large as Mars. This seems to fit scientists' calculations.... ⁽¹⁰⁾....., although many questions remain.
