[illegible]

The banner features a dark blue background with a subtle grid pattern. On the left is a circular emblem of the 'Pervaya Stantsiya 50' (First Station 50) space station, with the text 'ПЕРВАЯ СТАНЦИЯ 50' at the top and '16 января 1969' at the bottom. To the right of the emblem is a white box containing the text '2018-2019' and 'УЧЕБНЫЙ ГОД'. Further right is the 'Gagarin Cup' logo, which includes a stylized rocket icon and the text 'КУБОК ГАГАРИНА' and 'олимпиада школьников'. The central text 'АНГЛИЙСКИЙ ЯЗЫК' is written in large, white, outlined letters. At the bottom, two white boxes contain the text 'РЕСПУБЛИКАНСКИЙ ЭТАП' and '6 класс'.

## READING

A) In 1956 a Swedish sailor decided to try his luck and put his message in a bottle. He hoped to find a wife and wrote: "To someone Beautiful and Far away." Then he corked the bottle and threw it into the ocean. Two years later he received a letter from Sicily. The woman wrote: "I am not beautiful, but it's a miracle that this little bottle has travelled so far and long to reach me, that I must send an answer." Their correspondence ended in marriage.

B) Shark cage diving seems a real nightmare to most people. Others go crazy about it and ready to pay much money to see the sea monster in its natural habitat. The shark cage was invented by a professional diver Rodney Winston. He had been attacked by a shark and heavily injured. The man built the first cage to learn more about sharks and their behavior. There are a number places in the world where you can do the cage diving.

C) Picking mushrooms is a popular activity all around the world. There are a lot of kinds of mushrooms. Some of them are edible and some are extremely poisonous. Collecting mushrooms is not a game of chance – you should know what you take. If you have the slightest doubt, you should leave the mushroom in its place and look for something else. Mushroom poisoning may cause serious health problems and even death.

Are you interested in finding out more about the stars and planets in the night sky? Then come and join us at the Tracker Star-Watching Centre halfway up Mintal Mountain. We hold popular star-watching sessions almost every night of the year from 6.00 until 10.00. The Centre is run entirely on money given to us by public, so although there’s no actual charge for your tickets, we’re always grateful when people choose to give us large or small amounts of money- it all helps. And if after one of our evening sessions you become interested in finding out more, you’re willing to pay a small fee, then we run a range of daytime courses.

During our evening programmes, you’ll first see a documentary that tells you all about the history of the Centre and all the star watching programmes that we run here, and then you’ll move outside where several special telescopes are set up for you to see the stars in more detail. Our expert staff will manage all the equipment and during the evening they will guide you so that you get to see the most interesting objects, including double stars and planets. You may also get a chance to the planet Saturn, with its glowing rings though its brightness changes throughout the year. We’re so far up that the clouds are often below us, so our view of the night skies is clear and bright. We’ll also tell you about some of the most important things that can be seen in the night sky without equipment. There are always students from the University here who help out at the Tracker Centre in their spare time, and are prepared to give you any information you want about the stars.

Visitors to the Centre should note that we often experience near-freezing night-time temperatures at the Centre, so please dress in warm clothes. However, if you have a problem and find you are not warm enough, sweaters and scarves, which might make a nice souvenir, are available from the Centre store.

Visitors should also make sure they have a full tank of petrol in their vehicles before making the trip up to the Centre, as petrol is unavailable near the station, and the nearest petrol stations are about 40km away. The 12 km climb to the Centre can take some time – so make sure your car is in good enough condition to make it! We hope to see you at the Tracker Centre soon!

WATER

Water is the most common liquid on Earth. It covers about 71,4 % of the Earth. Pure water has no smell, <sup>1)</sup> \_\_\_\_\_(TASTY), or colour. Lakes, oceans and rivers are made of water. Precipitation is water that falls from clouds in the sky. It may be rain if warm or it may be snow if cold. If water gets very cold (below 0 degrees Celsius), it freezes and becomes ice. If water gets very hot (above 100 degrees Celsius) it boils and becomes steam. Water is very <sup>2)</sup> \_\_\_\_\_(IMPORTANCE) for life. Some studies show that in 2025 more than half the people around the world will not have enough water.

Water is fluid. Water is the only <sup>3)</sup> \_\_\_\_\_(CHEMISTRY) substance on Earth that exists <sup>4)</sup> \_\_\_\_\_(NATURAL) in three states.

Only about 3% of all water on Earth is fresh water. The rest is salt water. <sup>5)</sup> \_\_\_\_\_(FISH) in salt and fresh water bodies is a great source of food for many countries.

People use water in industrial processes, cooking and washing. Water is also central to many sports and other forms of <sup>6)</sup> \_\_\_\_\_(ENTERTAIN), such as swimming, boating, boat racing, surfing, sport fishing and diving.
