#### Valentina Tereshkova

Valentina is a cosmonaut and an engineer. She is famous for being the first woman to go into space.

Valentina was born in 1937. Her family was very poor. She worked in a factory but she dreamed of bigger things. Valentina joined a parachute club for fun. Valentina's country wanted to be the first to send a woman into space. Valentina was given a place in a space program because she was good at parachute jumps. Valentina and four other women worked hard and did lots of tests. Out of the five women, only Valentina was chosen to go into space.

In 1963, Valentina flew alone in space on a shuttle called Vostok VI. She went around the Earth 48 times, setting a new record. She had a bumpy ride back to Earth! The ship's programming went wrong and the ship nearly crashed. Luckily, clever Valentina was able to fix the problem and landed with just some bruises on her face. After her flight, Valentina became an engineer and then a doctor. She now works for world peace
